

FOR IMMEDIATE RELEASE

World Technology Welcomes Living Oceans Foundation to Elevate Global Ocean Awareness

This alliance will raise awareness of ocean conservation by expanding the reach of the Foundation's educational content through the World Technology global platform.

World Technology is proud to partner with the Khaled bin Sultan Living Oceans Foundation and support their educational initiatives.

NEW YORK, 21 April 2025 — [World Technology](#), a global platform with a mission to celebrate human ingenuity through technology, science and innovation, welcomes the [Khaled bin Sultan Living Oceans Foundation](#), a non-profit organization dedicated to protecting and restoring the world's oceans through science, outreach, and education.

This partnership marks a vital step in connecting ocean science with global audiences, as World Technology will leverage its channels and platforms to amplify the Foundation's award-winning educational resources and conservation initiatives. Together, the two organizations are committed to raising awareness of critical ocean issues — including climate change, overfishing, and pollution — and fostering a deeper understanding of coral reef ecosystems through technology and storytelling.

“We are honored to welcome the Khaled bin Sultan Living Oceans Foundation as it works to preserve, protect, and restore the world's oceans and aquatic resources through research, education, and outreach with science-based solutions,” said **Paul J. Foster, Executive Chairman of World Technology**. “Through this collaboration, we are excited to spotlight their impactful content and bring their message of ocean stewardship to a global, scientific & tech-savvy audience.”

Established in 2000 under the leadership of HRH Prince Khaled bin Sultan, the Foundation is renowned for pioneering coral reef research and conservation, including the Global Reef Expedition—the largest coral reef survey and habitat mapping mission in history. World Technology will actively promote the Foundation’s interactive education portal, engaging curriculum, and conservation films across its platforms to connect with students, educators, and science enthusiasts worldwide.

“At the Khaled bin Sultan Living Oceans Foundation, we are committed to advancing ocean literacy and inspiring the next generation of marine stewards. By partnering with World Technology Games to share our educational and award-winning films online, we have an incredible opportunity to reach a broader audience and raise awareness about the critical issues facing our coral reefs. We hope this collaboration not only highlights the beauty and importance of these ecosystems, but also encourages more people—especially students and educators—to explore our Coral Reef Ecology Curriculum, and take action to protect our ocean,” said **Alexandra Dempsey, CEO of the Khaled bin Sultan Living Oceans Foundation.**

World Technology and the Khaled bin Sultan Living Oceans Foundation are united in their commitment to supporting the [United Nations Sustainable Development Goals](#) (UN SDGs), particularly those focused on life below water and quality education.

To explore the Living Oceans Foundation’s free educational resources, visit their Coral Reef Ecology Curriculum and Education Portal at <https://www.lof.org/education/portal/>.

About World Technology

[World Technology](#) (WT) is a global organization that convenes the worlds of technology, science and innovation. The World Technology Games is the annual flagship competition celebrating human ingenuity across Life, Earth, Data and Industrial sciences. Set to debut in 2026, the annual five-day event will convene scientists, engineers, technologists and innovators from around the world. The World Technology Summit is staged in key world cities, and focuses on humanity’s greatest challenges. WT is helmed by an accomplished Leadership team and a Global Advisory Group of leading experts with a mission to elevate great human ingenuity behind the world’s greatest advancements of today and tomorrow. About the Khaled bin Sultan Living Oceans Foundation

The Khaled bin Sultan Living Oceans Foundation is a nonprofit organization dedicated to providing science-based solutions to protect and restore ocean health. Our marine conservation initiatives focus on preserving coral reefs, restoring mangrove forests, and advancing ocean literacy worldwide. Through science, outreach, and education, we equip people with the knowledge and tools to safeguard our oceans while inspiring and training the next generation of ocean stewards.
